

Scenario worksheet: Team Teaching

Two lecturers teach a large first-year module together. In previous years they have alternated lectures, but this year have begun teaching at the same time and find that it makes their lectures more lively and enjoyable. Some of the lecture time they take turns speaking, but at other times their lectures resemble a conversation. Often one will use the whiteboard or control the PC while the other talks or wanders around interacting with students. They would like to begin capturing their lectures but are not sure if they will have to make changes which might affect their dynamic, or even if the system is capable of capturing all the lecture's elements.

Resource Summary

Topic: Multiple lecturers, delivery

Authors: Amanda Hardy, Juliet Hinrichsen

Institution: Coventry University

Target audience: Staff Developers

Keywords: scenario; team teaching; delivery; issues

Date produced: 1 September 2010

Comment:

Things to Consider

What are the main issues?

Who do they impact?

How might the issues be addressed?

Authors: Amanda Hardy, Juliet Hinrichsen
